DAC COMMUNITY OF PRACTICE ON POVERTY AND INEQUALITIES

Supports DAC members in sharpening their development co-operation's focus on the reduction of **poverty and inequalities** (P&I), and helps translate commitments into action.

Convening role

- **Core Group:** P&I experts from 17 DAC members. Peer exchange and learning. Chair EC.
- **Broader community:** P&I experts, practitioners and advocates from DAC members, multilateral organisations, partner countries, academia & civil society (incl. TU).
 - Meets for an annual meeting (Dec 2023) and biannual thematic discussions.

Analytical work

- **Analysis** of how DAC Members are addressing P&I through their development co-operation
 - P&I broadly shared as overarching policy goals, but gaps remain in implementation and allocations.
- Laying the ground for potential OECD/DAC **normative framework** on P&I (guidance?) – tbd.

Why should you engage in the DAC CoP-PI and how?

- Labour policies: a critical lever to reduce poverty and inequalities.
- On average in 2020-21, DAC Members allocated:
 - USD 118 million to **Labour Rights**
 - USD 13 million to **Social Dialogue**
- TU are key partners to raise the P&I agenda at the DAC, incl. in relation to workers' rights and social dialogue.
 - Collaboration on 2022 and 2023 TU-DAC Forum.
 - ITUC regular contributions to CoP-PI meetings.
 - Explore opportunities for TUs to further share their experience in building fairer and more prosperous societies, and their perspectives on how development co-operation can be maximised to further support decent and climate friendly work.
