

# Fiscal Space for Universal Social Protection

International Labour Office Isabel Ortiz, Director Social Protection International Labour Organization (ILO)

ITUC WSM FES Global Conference on Financing Social Protection Brussels, 17 September 2018

### Introduction: Extending social protection systems

### over 100 years – a story of success

Year: 1920

Year: 1940

Year: 2015

No data

Countries achieve universality by a mix of **social insurance** (*financed from contributions*) and a **floor of social assistance** (*financed from the general budget*) Scope of legal coverage

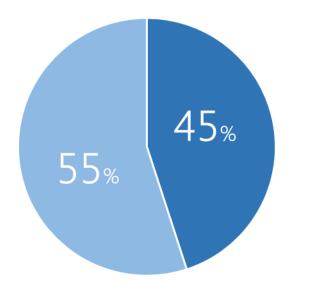

Comprehensive scope (all 8 policy areas)

Nearly comprehensive scope (7 policy areas)

Intermediate scope (5–6 policy areas)

Limited scope (1–4 policy areas)

### **Financing social protection is an urgent priority**

 $\mathsf{Only}\,45\%$ 

of the world population is covered by at least one social protection benefit (SDG indicator 1.3.1)

SDG indicator 1.3.1

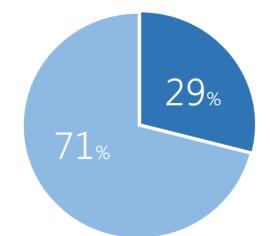

4 billion people (55%) are still unprotected

If we consider all areas of social protection from child benefits to old-age pensions

Only 29%

of the global population has access to comprehensive social protection

5.2 billion people (71%) are not, or only partially, protected

#### Benefits must be adequate, according to ILO standards

Source: ILO World Social Protection Report 2017-19

### How to Finance Universal Social Protection with Adequate Benefit Levels in Times of Austerity?

- About 124 countries cutting public expenditures in 2018 (81 developing and 43 high income countries)
- Many governments considering wage bill cuts/caps, targeting social protection, pension reforms, health reforms

### There are alternatives

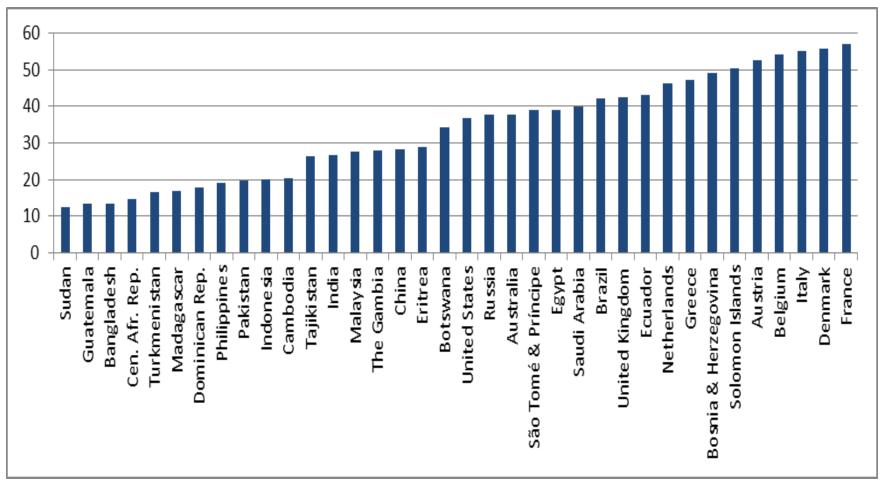

Learn more and check your country here:

<u>The Decade of Adjustment: A Review of Austerity Trends 2010-2020 in 187 Countries</u> ILO/IPC/South Centre

### **Government Spending Choices Vary Widely**

Total Government Expenditures (% GDP), Selected Countries, 2014

Source: Ortiz, Cummins, Karunanethy 2017: "<u>Fiscal Space for Social Protection and the SDGs: Options to Expand Social Investments in 187</u> <u>Countries</u>" ILO, UNICEF and UNWomen

### ...and likewise, Government Revenue Choices Vary Widely

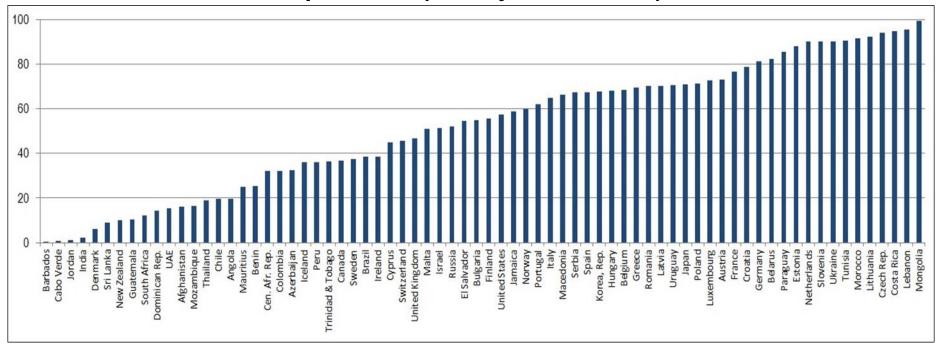

### Fiscal Space for Universal Social Protection Systems/Floors, Exists Even in the Poorest Countries

- There is national capacity to fund universal social protection systems/floors in virtually all countries. There are many options, supported by UN and IFIs policy statements:
  - Expanding social security coverage and contributory revenues
  - 2. Re-allocating public expenditures
  - 3. Increasing tax revenues
  - 4. Lobbying for increased aid and transfers
  - 5. Eliminating illicit financial flows
  - 6. Using fiscal and foreign exchange reserves
  - 7. Managing debt: borrowing or restructuring debt
  - 8. Adopting a more accommodative macroeconomic framework (e.g. tolerance to some inflation, fiscal deficit)

### OPTION 1. Expanding Social Security Coverage and Contributory Revenues

- Increasing coverage and therefore collection of contributions is a reliable way to finance social protection (eg. Argentina, Brazil, Tunisia, Uruguay)
- Social security contributions also encourage formalization of the informal economy.
- Typically through improvements in the administrative and institutional framework of the social contribution collection system, facilitating and increasing tax coverage and social security of micro and small enterprises

# Ratio of social security contributions to public social protection expenditure (latest year available)

### **1.b. Extending Social Insurance Contributory Coverage**

#### **Typical Design Options**

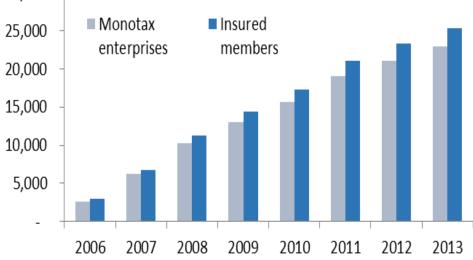

- Employers and workers contributions for public social insurance in accordance with ILO Conventions and Recommendations
- Extend to specific groups: Micro enterprises, Domestic Workers, Rural workers, etc encouraging formalization of the informal economy
- Subsidize benefits and simplify procedures eg Monotax in Uruguay (also Brazil, Argentina), a single payment covering taxes and contributions collected by the Uruguayan Social Security (BPS). Learn: Duran, F. 2015. Monotax. ILO

#### Get agreement through NATIONAL SOCIAL DIALOGUE, including Ministry Finance

 See <u>Assessment Based National</u> <u>Dialogue Guide</u>

Uruguay: Extending social security coverage to the selfemployed and workers in microenterprises: Number of registered MONOTAX enterprises and insured members, 2006–13

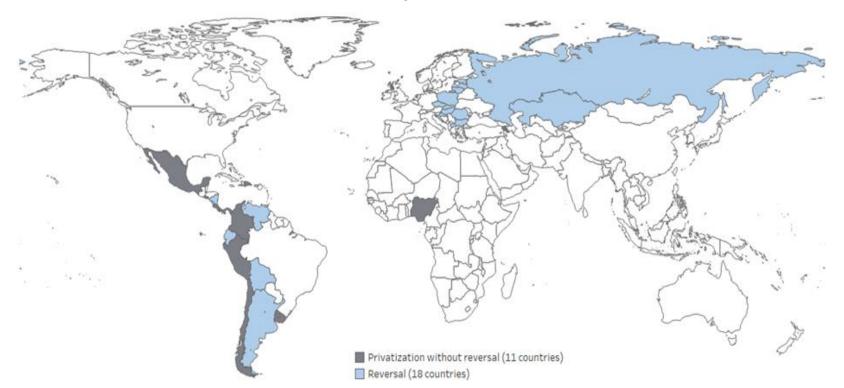

### **1.c.** Beware of attacks on social insurance

Social insurance schemes are redistributive for two main reasons:

- Transfers from employers to workers
- From the healthy to the sick, disabled or unable to work (eg maternity), from high income earners to low income earners

Beware of attempts to cut employers contributions (the so called "labor taxes") Beware of attempts to privatize social insurance and set individual accounts (no redistribution – individual saving schemes); negative fiscal and social impacts

#### Countries that privatized social security pensions and reversals from privatization

### **OPTION 2. Re-allocate Public Expenditures**

- Main options:
  - Replacing high-cost, low social impact expenditures (eg. military)
  - Eliminating inefficiencies
  - Fighting corruption (estimated 5% world GDP!)

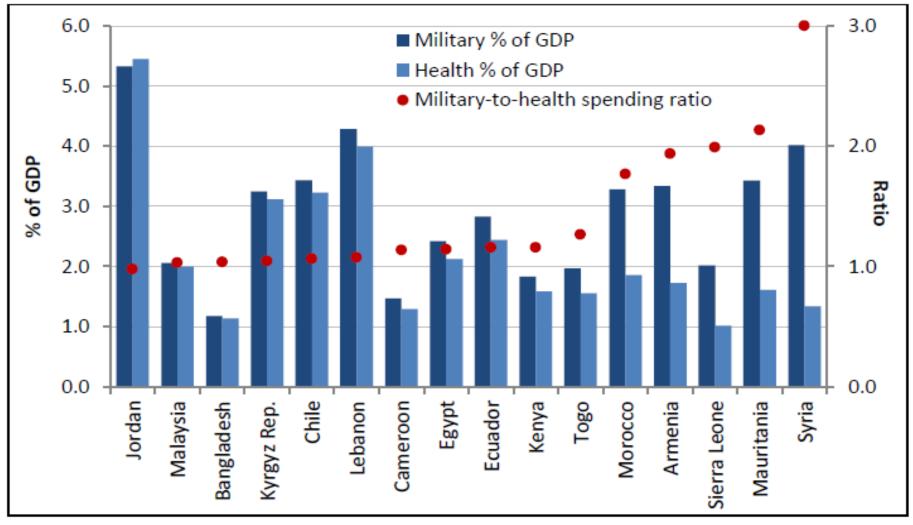

### Did you know that...

- Costa Rica and Thailand reallocated military expenditures for universal health
- Egypt created an Economic Justice Unit in the Ministry of Finance to review expenditure priorities.

### **2.b. Re-allocate Public Expenditures**

Military and Health Spending in Selected Developing Countries, 2006-09 (countries with no major armed conflict since 2000)

Source: Ortiz and Cummins 2012: "Finding Fiscal Space," in <u>A Recovery for All</u>, UNICEF.

### **2.b.** Re-allocate Public Expenditures: Fuel Subsidies

**Reducing energy subsidies is a potential source of funding for universal social protection systems.** When universal subsidies are withdrawn, food and transport prices increase and can become unaffordable for many households; also slow down economic activity and thus generate unemployment. This is why the elimination of subsidies has often been accompanied by the development of a "safety net" as a way of compensating the poor; however beware of the following:

- **Timing**: While subsidies can be removed overnight, developing social protection programmes takes a long time, particularly in countries where institutional capacity is limited. High risk that subsidies will be withdrawn and populations will be left unprotected, making food, energy and transport costs unaffordable for many households.
- Targeting the poor punishes the middle classes and excludes vulnerable households. In most developing countries, the "middle classes" have low incomes and are very vulnerable to price increases
- Allocation of cost-savings to develop universal social protection: The large cost savings resulting from reductions in energy subsidies should allow countries to develop comprehensive social protection systems: fuel subsidies are large, but compensatory safety nets tend to be small in scope and cost. For example, in Ghana the eliminated fuel subsidy was US\$1 billion in 2013, whereas the targeted social protection LEAP programme costs only about US\$20 million per year (where did the rest go?).

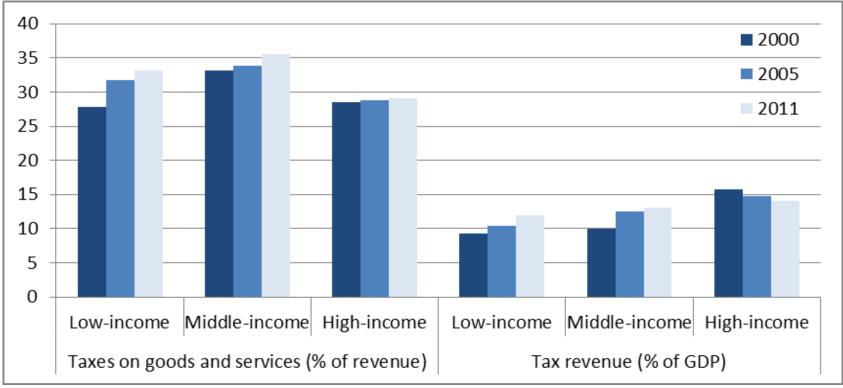

### **OPTION 3. Increasing Tax Revenues**

- Income taxes
- Corporate taxes, including the financial sector
- Taxing natural resource extraction
- Property and inheritance taxes
- Tariffs (imports/exports)
- Consumption/sales taxes, tolls

# MORE PROGRESSIVE

**MORE REGRESSIVE** 

#### Taxes on goods/services and overall tax revenue by income groups, 2000-11

### **3.b. Increasing Tax Revenues**

High income inequality should make governments move away from indirect taxation (eg. consumption/sales taxes) but...

#### Developing Countries that Lowered Individual and Corporate Income Tax Rates for the Top Income Brackets, 2014

### **3.c. Increasing Tax Revenues**

Taxing Natural Resource Extraction expanding in many developing countries

Source: "Fiscal Space for Social Protection and the SDGs: Options to Expand Social Investments in 187 Countries" (2017) ILO, UNICEF and UNWOMEN

### **3.d. Increasing Tax Revenues**

Other taxes:

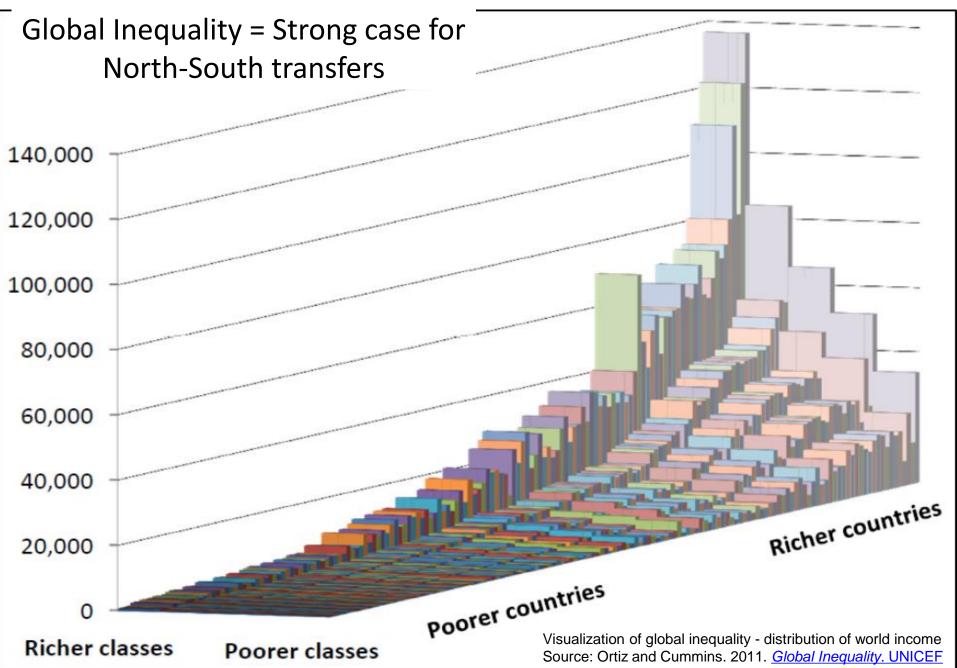

- Property and inheritance taxes
- Taxes on tourism, airlines and hotels (eg. Ghana, Liberia, Maldives)
- Remittance taxes (eg. Colombia, Georgia, Peru, Poland)
- National lotteries (eg. China Welfare Lottery, Spain's ONCE Lottery for the blind)

#### Did you know that...

- Brazil used a financial transaction tax to expand social protection coverage
- Bolivia is taxing hydrocarbons to finance *"Renta Dignidad"*, a universal social pension for all older persons
- Mongolia finances a universal child benefit from a tax on copper exports

### **OPTION 4. Increased Aid and Transfers**

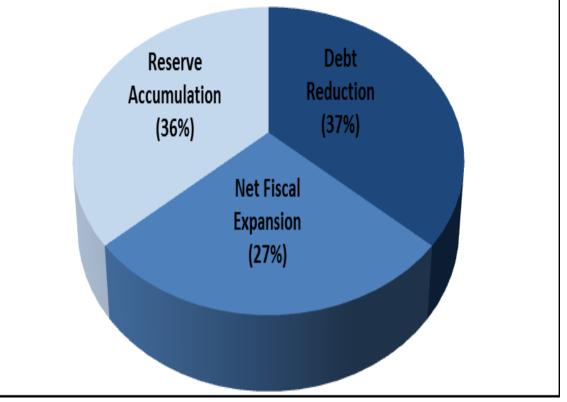

| _                       |                 |                 |
|-------------------------|-----------------|-----------------|
|                         | Country         | % of global aid |
|                         | Afghanistan     | 4.7             |

|                         | Nepal           | 0.6             |
|                         | Total/average   | 5.0             |

### 4.b. Increased Aid

- Strong justification for North-South transfers
- Limited volume, at about 0.3% of GNI donors
- Issues such as concentration of aid, utilization

#### Use of ODA in Sub-Saharan Africa, 1999-2005

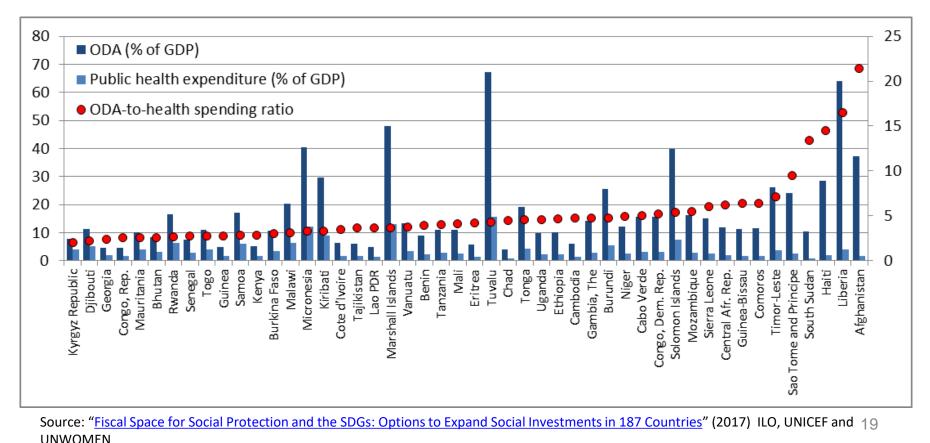

Source: IMF (2007)

### 4.c. Lobbying for North-South transfers (ODA) and South-South transfers

- Engage with donor governments or international organizations in order to ramp up North-South or South-South transfers
- South-South cooperation smaller but growing

#### ODA and health spending in selected developing countries, 2010-12 (average values)

### **Avoid South-North Transfers!**

• Debt interest payments, profit remittances and public/private investments in capital markets in developed economies largely offset net financial inflows to developing countries

Net Transfer of Financial Resources to Developing Economies, 1998-2014

### **OPTION 6. Use of Fiscal Reserves**

#### Sovereign Wealth Funds based on Fiscal Reserves, Selected Countries, June 2014

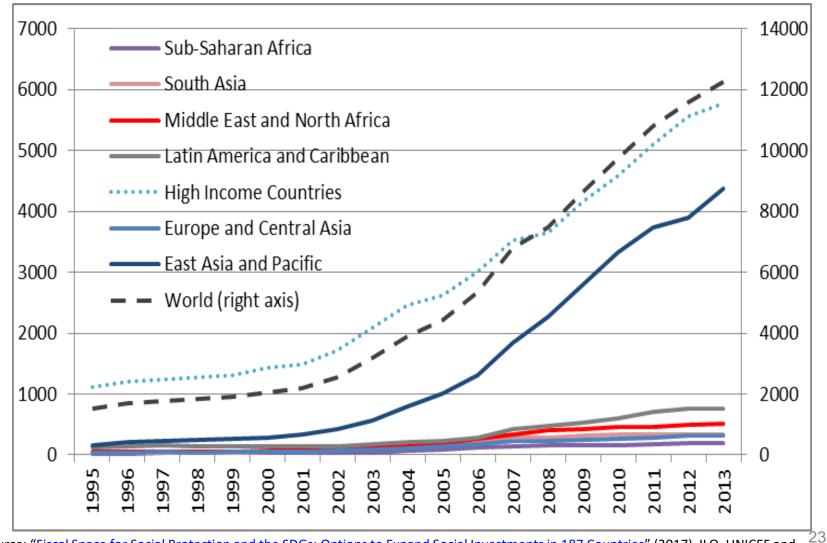

Example - Timor Leste – Low human development indicators but billions invested overseas in SWF

| Country           | Fund name                                 | Assets* | Inception | Origin            |
|-------------------|---|---------|-----------|-------------------|
| China             | China Investment Corporation              | 652.7   | 2007      | Non-Commodity     |
| China             | SAFE Investment Company                   | 567.9   | 1997      | Non-Commodity     |
| China – Hong Kong | Hong Kong Monetary Authority Investment   | 400.2   | 1993      | Non-Commodity     |
| China             | National Social Security Fund             | 201.6   | 2000      | Non-Commodity     |
| Russia            | Reserve Fund                              | 88.9    | 2008      | Oil               |
| Russia            | National Welfare Fund                     | 79.9    | 2008      | Oil               |
| Kazakhstan        | Samruk-Kazyna JSC                         | 77.5    | 2008      | Non-Commodity     |
| Algeria           | Revenue Regulation Fund                   | 77.2    | 2000      | Oil and Gas       |
| Kazakhstan        | Kazakhstan National Fund                  | 77.0    | 2000      | Oil               |
| Libya             | Libyan Investment Authority               | 66.0    | 2006      | Oil               |
| Iran              | National Development Fund of Iran         | 62.0    | 2011      | Oil and Gas       |
| Malaysia          | Khazanah Nasional                         | 40.5    | 1993      | Non-Commodity     |
| Azerbaijan        | State Oil Fund                            | 37.3    | 1999      | Oil               |
| Iraq              | Development Fund for Iraq                 | 18.0    | 2003      | Oil               |
| Timor-Leste       | Timor-Leste Petroleum Fund                | 16.6    | 2005      | Oil and Gas       |
| Chile             | Social and Economic Stabilization Fund    | 15.2    | 2007      | Copper            |
| Russia            | Russian Direct Investment Fund            | 13.0    | 2011      | Non-Commodity     |
| Peru              | Fiscal Stabilization Fund                 | 7.1     | 1999      | Non-Commodity     |
| Chile             | Pension Reserve Fund                      | 7.0     | 2006      | Copper            |
| Botswana          | Pula Fund                                 | 6.9     | 1994      | Diamonds Minerals |
| Mexico            | Oil Revenues Stabilization Fund of Mexico | 6.0     | 2000      | Oil               |

Source: "Fiscal Space for Social Protection and the SDGs: Options to Expand Social Investments in 187 Countries" (2017) ILO, UNICEF and UNWOMEN

### 6.b. Use of Reserves

## Foreign exchange reserve accumulation by developing region, 1993-2013 (in billions of current U.S. dollars; excluding gold)

Source: "Fiscal Space for Social Protection and the SDGs: Options to Expand Social Investments in 187 Countries" (2017) ILO, UNICEF and UNWOMEN

### **OPTION 7. Managing Debt: Borrowing and Debt Restructuring**

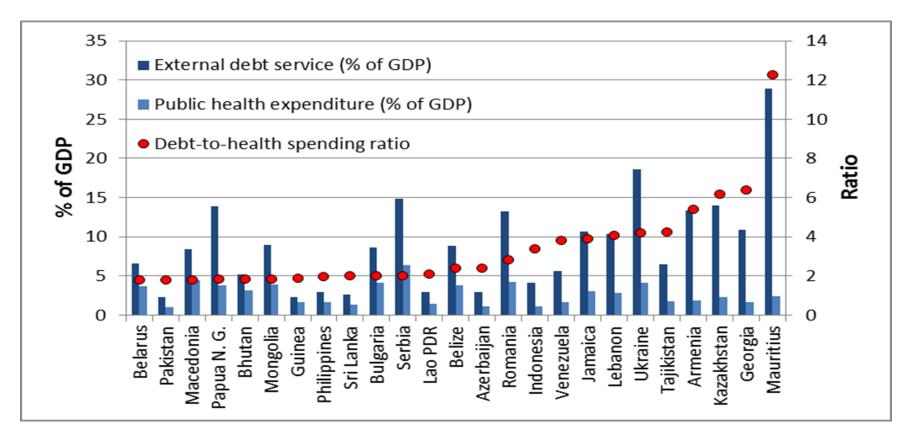

#### Borrowing

Some developing countries show potential capacity to engage in further borrowing, both domestically and externally

- Loans, either from commercial or development banks or funds
- Issuing government securities, such as bonds

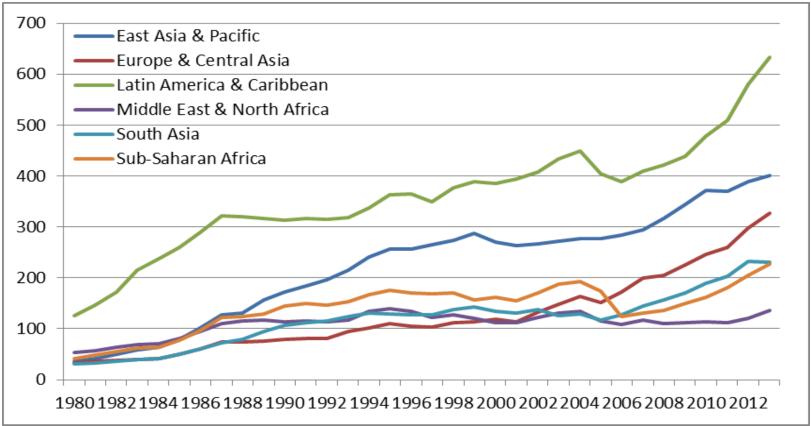

#### **Debt restructuring**

Some developing countries need to reduce existing levels of debt or debt service.

### 7.b. Borrowing

#### Public bonds by developing regions, 1980-2013\* (in billions of current US dollars)

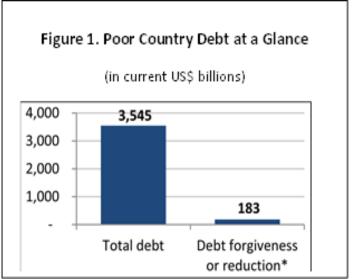

#### Did you know that...

• South Africa issued municipal bonds to finance basic services and urban infrastructure after the apartheid era

### **7.c. Debt Restructuring**

Five main options available to governments to restructure sovereign debt:

- *Re-negotiating debt* More than 60 countries since 1990s
- Achieving debt relief/forgiveness HIPC
- Debt swaps/conversions More than 50 countries since 1980s
- *Repudiating debt* Iraq, Iceland
- *Defaulting* more than 20 countries since 1999, including Argentina and Russia

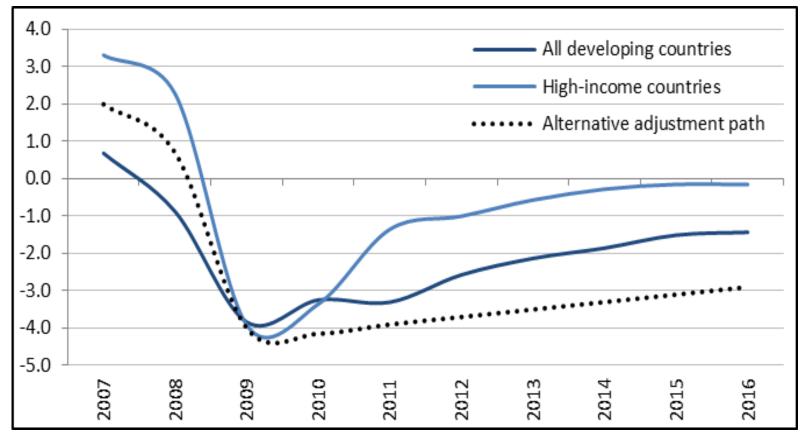

Important – concept of illegitimate debt: responsibility not only debtors, but also creditors Need for an international debt work-out mechanism

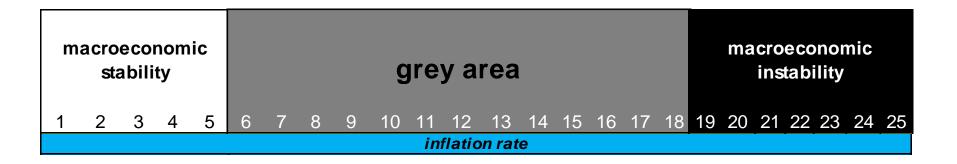

### **OPTION 8. Adopt a more Accommodating Macroeconomic** Framework

### **Fiscal policy**

Projected Budget Deficits and Alternative Adjustment Path, 2007-16 (% of GDP)

### 8.b. More Accommodating Macroeconomic Framework

| Country        | Fiscal<br>Deficit<br>2014 | Health<br>Budget in %<br>total budget |      | A 2% increase in<br>Fiscal Deficit would<br>allow 2014 | Adjustment with a<br>Human Face |
|----------------|---------------------------|---------------------------------------|------|--|---------------------------------|
| South<br>Sudan | - 9.0%                    | 4.0%                                  | 64.1 | 22% more health expenditures                           |                                 |
| Guinea         | -5.9                      | 6.8                                   | 64.9 | 6.8% more health expenditures                          |                                 |

### **8.c. Monetary policy**

#### Purported Safe Inflation Thresholds for Developing Countries

| Source   | Author(s)                             | Inflation<br>Threshold (%) |

| Grenada                        | 1.6            | Dominican Republic | 3.6            |
| Tonga                          | 1.6            | Seychelles         | 3.6            |
| Benin                          | 1.7            | Mauritius          | 3.7            |
| Vanuatu                        | 1.7            | Sri Lanka          | 3.8            |
| Marshall Islands               | 1.7            | Mexico             | 3.9            |
| Armenia                        | 1.8            | Haiti              | 4.0            |
| Belize                         | 1.8            | Philippines        | 4.5            |
| Albania                        | 1.8            | Cambodia           | 4.5            |
| Thailand                       | 2.1            | Georgia            | 4.6            |
| St. Lucia                      | 2.1            | Mozambique         | 4.6            |
| Republic of Congo              | 2.2            | Iraq               | 4.7            |
| China                          | 2.3            | Gabon              | 4.7            |
| Serbia                         | 2.3            | Botswana           | 4.8            |
| Dem. Rep. of the Congo         | 2.4            | Paraguay           | 4.8            |
| Timor-Leste                    | 2.5            | Libya              | 4.8            |

### **RECAP: EIGHT OPTIONS supported by UN and IFIs policy statements:**

- 1. Increasing contributory revenues (eg Argentina, Brazil, Tunisia, Uruguay)
- 2. Re-allocating public expenditures (eg. Ghana, Indonesia, Thailand)
- 3. Increasing tax revenues (eg. Bolivia, Brazil, Mongolia, Zambia)
- 4. Fighting illicit financial flows
- 5. Lobbying for increased aid and transfers
- 6. Tapping into fiscal and foreign exchange reserves (eg Chile, Norway)
- 7. Restructuring/managing debt (eg Ecuador, Iceland, Iraq)
- 8. Adopting a more accommodative macroeconomic framework (e.g. tolerance to some inflation, fiscal deficit)

### Fiscal Space Strategies for Social Protection: Country Examples

### Each Country Has Different Policy Options that Must Be Agreed In National Social Dialogue

- Social protection has strong impacts on people, addressing households and families' daily concerns.
- But decisions affecting people's welfare are often taken behind closed doors, without adequate consideration of their distributional impacts.
- Ministers of Finance/Planning should have all possible fiscal scenarios and options, associated social impacts, risks and trade-offs, fully explored.
- A set of alternative policy options for inclusive development should be discussed in national social dialogue.

International Labour Office

# Thank You
